WordPress in Education

Yesterday · 6:00 PM
Code School

This month, we are covering WordPress in education. Even though WordPress had it's humble beginnings as a blogging tool, it has evolved into a framework limited only by one's own imagination. This meetup we will learn more about how WordPress is used for educational purposes.

Using WordPress in education is not just limited to Colleges, Schools and Universities. While your site may not be geared towards education, consider that you may need to find ways to educate your users to enable them to support themselves so you can free up more of your valuable time to do more for your site. Some of the biggest agencies use LMS systems to educate their customers on it's products.

This meetup will include networking time, snacks, beverages, and local WordPress experts available to answer questions.

Our speaker this meetup:

Carol Gann - Benefits and Pitfalls of WordPress Learning Management Systems (LMS)

Announcements:

WPCampus, a conference based on the confluence of WordPress and higher education has announced it's inaugural conference. Learn more.

WordCamp Orlando is in the works! Block off your calendar for October 7-9.

Next month's theme is E-Commerce.

CAROL - Nice job with the presentation. Lots of 'stuff' to process but I'll probably have a ?or2 after I get to look at some of the options up close. Thank You! LeeT
P.S. Not my picture - I'm much older & scarier in life...
